

AluSign

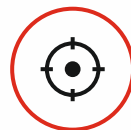

AluSign is a surface treated aluminium material specifically designed for premium laser marking with **CO₂, fiber and diode lasers**. The innovative coating produces high contrast, deep black markings with exceptional readability, high detail resolution and excellent UV resistance for indoor and outdoor applications.

Ideal for Nameplates and Technical Markings

AluSign is the ideal solution for durable markings, nameplates, scales, industrial signs, and technical applications that demand maximum precision, long lasting durability, and a professional appearance.
